

# 3-WHEEL SIT-DOWN COUNTERBALANCED TRUCK

MODEL 4450

For operations requiring a multi-purpose lift truck, the *Raymond*® Model 4450 3-wheel sit-down counterbalanced truck delivers productivity, efficiency and enhanced performance for a variety of applications. Designed for smooth transport of products and stacking of pallets, the Model 4450 is suited for a variety of applications and is available in capacities up to 4,000-lbs.

The Model 4450 delivers outstanding maneuverability and features speed reduction during cornering, mast dampening for improved load handling, and wide steer tire placement to enhance truck stability and performance.

# 3-WHEEL SIT-DOWN COUNTERBALANCED MODEL 4450

## PRODUCTIVITY »

Designed to deliver increased productivity and efficiency with every pallet move, the *Raymond* Model 4450 brings you quick-response steering and smooth hydraulics for more precise load control. Its *ACR System*™ delivers powerful AC drive and lift for longer battery life, less downtime and reduced cost of ownership. And the choice of 36-volt or 48-volt configurations provides the power needed for your operation, and allows for battery commonality with your existing fleet. Intelligent steering control makes tight spaces easier to navigate while optional high-intensity work lights keep your operation running smoothly in low-light conditions. Operators have a clear line of sight to the load for increased efficiency and reduced product damage.

## ERGONOMICS »

Superior ergonomics and quiet operation improve operator comfort on the Model 4450. Featuring intuitive controls, including a steer tiller knob for enhanced control while operating hydraulic functions with the other hand, and a roomy, easy-to-access, comfortable compartment, the Model 4450 puts your operators first. The convenient, ergonomic tilt steering wheel is included as standard equipment, as is the semisuspension seat that adjusts for back tilt, operator weight and lumbar support for superior comfort.

## MAINTENANCE »

Built to endure serious workloads day-in and day-out, the Model 4450 is designed with fewer wearable parts for lower overall maintenance costs. Its battery can be conveniently removed from either side or from the slotted overhead guard, allowing for vertical extraction. Oil-cooled disc brakes reduce heat and wear, and significantly reduce both the cost and downtime associated with routine brake maintenance. Finally, Raymond's exclusive *ACR System* has fewer moving parts and easier diagnostics to further reduce maintenance costs and downtime.

## VERSATILITY

Optional fingertip hydraulic controls and bidirectional floor-mounted travel pedals allow you to match the performance to the operator's skill level in order to improve productivity through versatility. Attachments such as fork positioners, carton clamps and slip sheets serve varied load-handling requirements. And to meet the needs of refrigerated warehousing applications, the Model 4450 is also available with cold storage conditioning.

 The roomy, comfortable operator compartment includes intuitive controls, and the semisuspension seat adjusts for back tilt, operator weight and lumbar support for superior comfort.

 The Model 4450 delivers excellent visibility for efficient load handling.

Due to continuous product improvement, specifications are subject to change without notice or obligation. Some systems and features shown are optional at extra cost. *ACR System* and *Raymond* are U.S. trademarks of The Raymond Corporation.
